

Importing data into Microsoft Excel

- 1. Open Excel. Click File, Open and choose the file offloaded from your Skye logger.
- 2. Go through the Text Import Wizard steps 1 to 3.
 - Step 1 Choose Delimited file type and click Next.
 - Step 2 Choose the Space delimiter (not Tab) and click Next.
 - Step 3 Click Finish

ext Import Wizard - Step 1 of 3	? ×
The Text Wizard has determined that your data is Fixed Width.	
this is correct, choose Next, or choose the Data Type that best describes your data. Original data type	
Choose the file type that best describes your data:	
Delimited - Characters such as commas or tabs separate each field. Einder are aligned in solutions with coarses between each field	
Start import at row: 1 🚖 File Origin: Windows (ANSI)
