## Skye RoHS Compliance Statement

Skye Instruments Ltd is actively committed to their role in protecting the environment by reducing the amount of hazardous substances in our products. Restricted substances are not intentionally added to products.

Skye Instruments Ltd's products fully meet the definition of RoHS compliance. The European Union has enacted legislation (Directive 2002/95/EC) effective July 1st, 2006 that restricts the use of Lead, Cadmium, Mercury, Hexavalent Chromium, Poly-Brominated Bi-Phenyls (PBB), and Poly-Brominated Di-Phenyl Ethers (PBDE) in a wide variety of electronic products and applications that are put on the market in EU member countries. Its replacement, Directive 2011/65/EU (RoHS-II) entered into force in 2011.

Those products stated by Skye instruments to be RoHS compliant are produced from materials and components where the presence of any of the restricted substances within them does not exceed the maximum stated concentration per homogeneous material as defined by the RoHS directive and shown in the following table:

<u>Substance</u>	<u>Limit per Homogeneous Material by weight</u>
Cadmium	0.01%
Lead	0.1%
Mercury	0.1%
Hexavalent Chromium	0.1%
Poly-brominated Bi-Phenyls	0.1%
Poly-brominated Di-Phenyl Ethers	0.1%
